

# EWC - ECOMMERCE SOLUTION

## MAKING USE OF THE COMMERCE HEADLESS ARCHITECTURE

In the modern e-commerce world, flexibility is crucial. The EWC e-commerce solution utilizes a headless commerce architecture that goes far beyond standard solutions. Our solution integrates seamlessly with Dynamics 365 Finance & Supply Chain Management (F&SCM), providing a comprehensive platform that adapts perfectly to your business needs.

**Flexible customization:** Our solution can be easily expanded and adapted to the specific needs of your company.

**Accelerated development:** Thanks to our SDK framework and tools such as Postman, you can test and implement new features quickly.

**Scalability and future-proofing:** EWC offers a platform that grows with your company and adapts to changing market conditions.

### Seamless integration:

Use the full functionality of Dynamics 365 F&SCM without the limitations of the standard solutions.

### Advanced features

Functions such as flexible shopping cart management and extensive API extensions increase the efficiency of your e-commerce platform.

### Scalability

Our solution grows with your requirements - whether for start-ups or established companies.

### Usable for every website with just 1 API

The extensions can be used for almost any website. There is only one data source (F&O).

# The functions

1

## **Shopping cart management:**

The heart of our solution. Our API enables dynamic shopping cart management, including price calculations and checkout optimization.

2

**Customer management:** Close gaps in your customer management. With our flexible API, you can seamlessly create and update customer information.

3

## **Advanced API functions:**

Order history: Search orders by customer and filter by sales status.  
Product search: Customized APIs for precise product searches that improve the user experience.

4

**Login/registration management:** A flexible API for customer registration that can be adapted to your specific requirements.
